

# TECHNOLOGY STACK

# Components & Technologies

S.No	Component	Description	Technology
1	User Interface	User views the prediction of natural disaster in the website.	HTML, CSS, JavaScript
2	Application Logic-1	Deployment	Python Flask
3	Application Logic-2	Training and building deep learning model	IBM Watson Studio
4	File Storage	To store dataset	IBM Cloud Object Storage
5	Machine Learning Model	To classify the natural disaster	Object Recognition Model
6	Infrastructure (Server / Cloud)	Application Deployment on Local System / Cloud Local Server Configuration: Python Flask Cloud Server Configuration : Cloud Foundry	Local, Cloud Foundry
